Hi there,

Welcome to my repository of DITA XML codes! This is a collection of codes that I have used in my work with DITA, and I am sharing it here for anyone who may find it useful or interesting. Although this repository was originally created for recruiters to check out my work, anyone is welcome to view and comment on the content.

Please note that this repository is still in the early stages of development, and I will be adding further content as my work allows me some time to do so. At the moment, the content in this repository is purely imaginary and should not be taken into account.

If you are interested in learning more about DITA and how it can be used in technical documentation, or if you have any questions or suggestions for me, please don't hesitate to reach out. I hope you find my work in DITA XML to be informative and helpful.

Thank you for visiting my repository!

Best regards, [

Writtall
